

Oticon Product Portfolio and Selection Guide

Clients have different needs, expectations and priorities when selecting a hearing aid. With this in mind, this Product Portfolio covers all price segments from Essential through to Premium, and all categories (*Performance *Design *SuperPower). Thus helping you satisfy ANY client who walks through your door.

FEATURES	BENEFITS
Fitting Bandwidth	Better match to targets and more fitting flexibility
Inium Feedback Shield	Anti-feedback algorithm that optimises audibility, signal quality and listening comfort system.
Artificial Intelligence	Artificial Intelligence (AI) is the decision-making feature in Oticon products. First it calculates and evaluates multiple different processing alternatives and then via the analysis/decision center selects the alternative that actually provides the best outcome
Connectivity/Wireless	Bluetooth Connectivity with Binaural features
YouMatic	Ability to accommodate for the individual user's preferences and abilities in the response and sound of the hearing instrument

FEATURES	BENEFITS
Special Purpose programs	Help to easily address performance issues in specific and challenging listening situations.
Tinnitus Sound Generator	With Oticon Tinnitus SoundSupport™ and unique nature sounds to offer tinnitus relief according to individual preferences.
Free Focus	Designed to mimic the ear's natural front focus which may improve front-back suppression and segregation for better speech following capability. Very high degree of individualisation of microphone settings.
Automatics	With advances in the algorithm, the microphone polar plots have more microphone options for enhanced speech intelligibility.
Back Dir	Allowing to hear speech coming from behind. Easily operated from ConnectLine App

FEATURES	BENEFITS
Adaptive Directionality	Automatically reduces multiple background noise sources even if they are moving to assist hearing speech in noise
Spatial Sound	Customisable noise management that preserves interaural cues.
Noise Management	Maximum preservation of speech in noisy situations
Binaural Coordination	Controls both instruments with one touch for vc, programs and mute
Binaural Synchronization	Alignment of directionality and noise management in both ears creates a more stable sound picture
Binaural Processing	Maintains interaural intensity differences to preserve localisation ability and speech understanding in noise
Spatial Noise Management	Binaural processing that enables improved spatial awareness and comfort in asymmetric sound scenes.

FEATURES	BENEFITS
Speech Guard E	Specialized multi-channel compression system created to preserve the natural details of the speechwave form
Speech Rescue	Copy and Keep function. The high-frequency bands are copied to a lower-frequency region and the original high-frequency bands are kept in their original position. This preserves the natural relationship of the lowered signal.
DSE	Oticon proprietary non-linear prescription taking into account the special needs of a Power User
VAC+	Oticon proprietary non-linear prescription with up to 5 personal profiles, providing significant flexibility
Soft Speech booster	Delivering better listening performance of soft sounds and improved soft speech understanding.

ConnectLine

Streamer Pro 1.3 App		Phone Adaptor 2.0		ConnectLine Mic		TV Adaptor 2.0	
----------------------	---	-------------------	--	-----------------	---	----------------	---

The ConnectLine App for iPhone, iPad and iPod touch runs on iPhone 6 Plus, iPhone 6, iPhone 5s, iPhone 5c, iPhone 5, iPhone 4s, iPhone 4, iPad Air, iPad mini with Retina display, iPad mini, iPad (3rd and 4th generation), iPad 2, and iPod touch (5th generation) and requires Streamer Pro 1.2 App or later. When installing the ConnectLine App on iPad, search for iPhone apps in App Store. The ConnectLine App for Android smartphones and tablets requires any Streamer Pro with firmware 1.3 or later. Please visit www.oticon.com.au/app for more details on compatibility. Apple, the Apple logo, iPhone, iPad, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Android and Google Play are trademarks of Google Inc.
